

# USE WITH YOUR NEW CRUZE

Satguide has introduced a PND for cars, the Moov 560. It has a large 4.7-inch haptic touchscreen display and comes with a 400 MHz processor on board. All maps have been upgraded; it now covers over 404 cities across the country. It incorporates over 16 lakh points of interest. A few tweaks are still needed (they were there in the lower version too) but are manageable. The new add-on is the Bluetooth connectivity which lets you connect the device with your phone and make or receive calls using the navigator.
