### **SatNav Entertainment Device With Navigation!**

*SatGuide Moov200 features new Ver 8.0 maps, which boast of street coverage spanning across 628 cities and with two million PoIs.*

**Monday, January 11, 2010:** SatNav Technologies is launching SatGuide Moov200 3.5-inch entertainment device with navigation. The new sleek device has video, audio and photo features. SatGuide Moov200 has SiRF StarIII GPS chipset which comes with Instafix technology helping locate the position in the shortest possible time.

The SatGuide Moov200 device comes with 2GB memory and can play all file formats. The device features SatNav's new Ver 8.0 maps, which boast of street coverage spanning across 628 cities and with two million Points of Interest. The POIs are arranged in 42 different categories like airlines, airports, ATMs etc.

Amit Prasad, chief executive officer, SatNav Technologies, said, "SatNav strongly believes in innovation to develop economical and efficient products which cater to the needs of the Indian consumers, bringing savvy Moov200 Entertainment device which also offers GPS Navigation is another step in that direction. We have over 100 leading stores selling our products in each metro city today and we look forward to further ramp that up in the coming months."

The SatGuide Moov200 device is priced at Rs 13,990.
