

GPS Tracker Platform gets rave reviews

SatNav's GPS Tracker platforms SatTracx has been getting rave media reviews; it can track smartphones, tracker devices & more!

THE ECONOMIC TIMES

How To Keep Track of What's Important To You

GPS can be used for more than just navigation. Depending on who or what you need to locate, there is a combination of GPS devices and free apps that you can use. **Hitesh Raj Bhagat & Haran Balaji** show you how GPS technology can help get around this common problem.

Locate Stolen Vehicles

SatGuide Tracker - ₹11,490

SatGuide's vehicle tracker comes with a magnet cover that allows it to stick to metal. The price includes the cost of installation and it connects with your car battery for power (cables are included in the box). You can set a Geofence so that if your vehicle travels out of the authorised area, you will be notified. The only catch is that you need to purchase a GSM SIM card and subscribe to a SMS plan for the GPS tracking to work.

Secure Pets & Children

You could always use an inexpensive Android phone and an app like GPS Tracking Pro. If you'd rather not hand a phone over to your child or attach one to your pet's collar, you can get a small GPS tracker like TrackID (www.trackid.in) for ₹6,700. You get a small ready-to-use GPS + GSM tracker that you can place in a bag or clip onto clothing. There is a monthly fee of ₹299 which covers the cost of the tracker and data charges and 100 SMS per month. You can monitor the location on any browser. You can also set up geo-fences (safe zones) and be alerted via SMS when that fence is breached. SatGuide (www.satguide.in) also offers a phone with GPS for ₹4,999 which is specially designed for children.
